DETAILED ACTION

1. In view of the Brief filed on 1/24/05, PROSECUTION IS HEREBY REOPENED.

Thus, the rejection of last Office action has been withdrawn.

2. Claim 36 has been canceled.

Claims 1-35 and 37 remain pending for examination.

REASONS FOR ALLOWANCE

3. With respect to claims 1-35 and 37 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

With respect to claims 1, 16, 31, 32 and 35, the claimed features "a method of searching for a string in a lexical cache, said lexical containers associated with respective key lengths and configured to hold respective numbers of entries based on the respective key lengths" in conjunction with other elements of the independent claims would not found anticipated or obvious over the prior art made of record. With claims 6 and 21, the claimed features "identifying a hash table from among a plurality of hash tables based on the length of the key, said hash table containing sequences of slots for holding entries associated with strings, each of said sequences of slots corresponding to respective hash value, wherein at least one of the hash tables is configured to hold a different number of slots than at least another one of the hash table" in conjunction with other elements of the independent claims would not found anticipated or obvious over

the prior art made of record. With respect to claims 15 and 30, the claimed features "each of said sequences of slots corresponding to a respective hash value and a number of the slots being based on a respective key length, wherein at least one of the hash tables is configured to hold a different number of slots than at least another one of the hash tables" in conjunction with other elements of the independent claims would not found anticipated or obvious over the prior art made of record.

The dependent claims, being definite, further limiting, and fully enabled by the specification are also allowed.

The closest prior art, Li, U.S. Patent Number 5,774,588 relates to reducing the number of entries in a lexicon. Rangarajan et al., U.S. Patent Number 5,706,365 relates to systems and methods that index words in a document for subsequent search and retrieval but fail to teach the above limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
